

MI2023E**PROBABILITY AND STATISTICS****Version: 2023.1.0**

1. GENERAL INFORMATION

Course ID:	MI2023E			
Credits:	4			
Workload:	<i>Theory:</i> 45 hrs	<i>Exercise:</i> 30 hrs	<i>Practice:</i> 0 hrs	<i>Self-study:</i> 120 hrs
Prerequisites:	Calculus 1, Calculus 2, Algebra			
Co-requisites:	None			
Program	Business Analytics			
Level	Second-year students			
Level of using English in teaching	Materials, lecture slides, and assignment in English; Examination in English; Lectures in English.			

2. COURSE DESCRIPTION

The course provides students with the knowledge of probability such as concepts and inference rules for probability as well as random variables and common probability distributions (one-dimensional and two-dimensional); basic concepts of mathematical statistics which help students in dealing with statistical problems in estimation, hypothesis testing, simple linear regression, and correlation. Through the acquired knowledge, students are given a methodology for approaching practical models and finding out an appropriate solution.

3. COURSE LEARNING OUTCOMES

Learning Outcomes (LO)	Descriptions	Program Learning Outcomes
M1	Understand and be able to solve statistics and probability problems	
M1.1	Recognize principal notions and rules of probability, conditional probability, and independent events. Apply the total probability formula and Bayes' rule.	[1.1-1.4]
M1.2	Identify discrete and continuous random variables, and their probability distributions (probability mass functions, cumulative distribution functions, and probability density functions).	[2.1; 2.2]
M1.3	Identify uniform, binomial, Poisson distributions, and exponential distributions. Determine the critical values for well-known distributions: normal distribution, chi-squared distribution, t-distribution, and F-distribution.	[2.4]
M1.4	Compute the characteristics: mean, variance, covariance, and correlation coefficient. Determine marginal distributions. Recognize independence.	[2.3; 3.1-3.5]
M1.5	Identify the important role of random samples, and their	[3.6; 4.1; 4.2]

Learning Outcomes (LO)	Descriptions	Program Learning Outcomes
	characteristics (sample mean, sample variance), particularly of a normal sample. Apply the Central Limit Theorem and Laws of Large Numbers.	
M1.6	Estimate parameters using point estimators and confidence intervals.	[4.3; 4.4]
M1.7	Test statistical hypotheses, and explain the probability of type I and type II errors.	[5.1-5.3]
M1.8	Be able to explain simple linear regression and correlation. Apply the regression model and correlation model	[6.1-6.5]
M2	Apply statistics and probability knowledge to modeling and analysis	
M2.1	Understand and apply statistics and probability to analysis and create some models in real problems	[1.1-1.4; 2.1-2.4; 3.1-3.5; 4.1-4.4; 5.1-5.3; 6.1-6.5]
M2.2	Recognize simple statistical models and apply them to solve economic and engineering problems	[4.1-4.4; 5.1-5.4; 6.1-6.5]
M2.3	Understand and apply to reading specialized materials	[1.1-1.4; 2.1-2.4; 3.1-3.5; 4.1-4.4; 5.1-5.3; 6.1-6.5]
M3	Capacity to synthesize and present a statistics and probability problem as well as understanding responsibility and professional ethics	
M3.1	Capacity to work in groups, write reports and present presentations on the results of homework	[1.1-1.4; 2.1-2.4; 3.1-3.5; 4.1-4.4; 5.1-5.3; 6.1-6.5]
M3.2	Understanding responsibilities, professional ethics	

4. CONTENTS

Random events and probability formulas, random variables (one-dimensional and two-dimensional), probability distributions, statistical estimation theory, statistical decision theory, and simple linear regression and correlation.

6. EVALUATIONS

The overall grade of the course is evaluated throughout the learning process, including three main points: the attendance score (20%), the midterm test score (30%), and the final exam score (50%).

Assessment Component	Criteria	Assessment Forms	Course Learning Outcomes	Weight
A1. Attendance Score	Student attitude and diligence	Student diligence	M1, M2, M3	20%
A2. Midterm Test Score (*)	A2.1. Midterm Test 1 (MTS1, 15 core scale; Content: From week 1 to week 5)	Multiple choice questions	M1.1-M1.4, M2.1	30%
	A2.2. Midterm Test 2 (MTS2, 15 core scale; Content: From week 6 to week 10)		M1.2-M1.5, M2.1	
A3. Final Exam Score	Final Exam	Writing	M1, M2.1	50%

(*) The midterm test score (MTS) is calculated according to the formula $MTS = 1/3 (MTS1 + MTS2)$ and will be adjusted by adding active learning points. Active learning points are worth from -1 to $+1$, according to the Higher Education Regulations of Hanoi University of Science and Technology.

7. TEACHING PLAN

Week	Topics	LO	Teaching & Learning Activities	Assessment
[1]	[2]	[3]	[4]	[5]
1	Chapter 1: Random Events and Probability Calculation 1.1. Basic Notions 1.1.1. Events and Sample space 1.1.2. Events relation (Union, Intersection, Mutually exclusive events, Complement, Mutually exclusive and exhaustive events) 1.1.3. Methods of Counting (Multiplication Rule, Permutation, Combination, Repeated permutation) Problems - Chapter 1	M1.1 M2.1 M2.3 M3.1 M3.2	Teacher: - Giving lectures - Providing lecture notes, assignments - Leading discussions Student in class: - Participating class activities - Answering questions Student at home: - Reading documents - Do homework	A1 A2.1 A3

Week	Topics	LO	Teaching & Learning Activities	Assessment
[1]	[2]	[3]	[4]	[5]
2	1.2. Probability 1.2.1. Theoretical Probability Definition 1.2.2. Frequentist Definition 1.3. Additive and the Multiplicative Rules 1.3.1. Conditional Probability 1.3.2. Additive Rules 1.3.3. The Multiplicative Rules 1.3.4. Bernoulli Trial Calculator Problems - Chapter 1	M1.1 M2.1 M2.3 M3.1 M3.2	Teacher: - Giving lectures - Providing lecture notes, assignments - Leading discussions Student in class: - Participating class activities - Answering questions Student at home: - Reading documents - Do homework	A1 A2.1 A3
3	1.4. Bayes' Theorem 1.4.1. Law of Total Probability (LOTP) 1.4.2. Bayes' Rule Chapter 2. Random Variables and Probability Distributions 2.1. Random Variables 2.1.1 Discrete Random Variables 2.1.2 Continuous Random Variables Problems - Chapter 1	M1.1 M1.2 M2.1 M2.3 M3.1 M3.2		A1 A2.1 A3
4	2.2. Probability Distributions 2.2.1. Probability Mass Functions 2.2.2. Cumulative Distribution Functions 2.2.3. Probability Density Functions Problems - Chapter 2	M1.2 M2.1 M2.3 M3.1 M3.2	Teacher: - Giving lectures - Providing lecture notes, assignments - Leading discussions Student in class: - Participating class activities - Answering questions Student at home: - Reading documents - Do homework	A1 A2.1 A3
5	2.3. Mathematical Expectations 2.3.1. Expectation 2.3.2. Variance and Standard Deviation Problems - Chapter 2	M1.4 M2.1 M2.3 M3.1 M3.2		A1 A2.1 A3

Week	Topics	LO	Teaching & Learning Activities	Assessment
[1]	[2]	[3]	[4]	[5]
6	2.4. Important Probability Distributions 2.4.1. Uniform Distribution 2.4.2. Binomial Distribution 2.4.3. Poisson Distribution Problems - Chapter 2	M1.3 M2.1 M2.3 M3.1 M3.2	Teacher: - Giving lectures - Providing lecture notes, assignments - Leading discussions Student in class: - Participating class activities	A1 A2.2 A3
7	2.4.4. Exponential Distribution 2.4.5. Normal Distribution 2.4.6. Chi-Square Distribution 2.4.7. Student's t-Distribution Problems - Chapter 2	M1.3 M2.1 M2.3 M3.1 M3.2	- Answering questions Student at home: - Reading documents - Do homework	A1 A2.2 A3
8	Chapter 3. Pairs of Random Variables 3.1. Joint Probability Distributions 3.1.1. The Discrete Case 3.1.2. The Continuous Case 3.2. Marginal Probability Distributions 3.2.1. The Discrete Case 3.2.2. The Continuous Case 3.3. Conditional Probability Distributions 3.3.1. The Discrete Case 3.3.2. The Continuous Case Problems - Chapter 3	M1.2 M1.4 M2.1 M2.3 M3.1 M3.2	Teacher: - Giving lectures - Providing lecture notes, assignments - Leading discussions Student in class: - Participating class activities - Answering questions Student at home: - Reading documents - Do homework	A1 A2.2 A3
9	3.4. Independence 3.4. Functions of Two Random Variables 3.5. Covariance and Correlation 3.5.1. Covariance. Covariance Matrix 3.5.2. Correlation Coefficient Problems - Chapter 3	M1.4 M1.5 M2.1 M2.3 M3.1 M3.2		A1 A2.2 A3

8. COURSE POLICIES

- Students are expected to follow the regulations of Hanoi University of Technology and School of Economics and Management
- For any cheating during the exam or exercise, students must be disciplined by the school and get 0 points for the course.
